DEPARTMENT DASHBOARDS

Only available for local governments

NEW: Department Dashboards

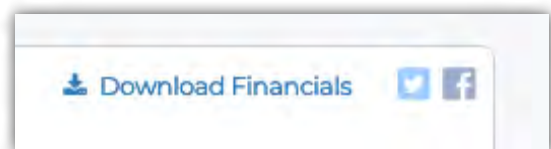

Department dashboards is a new solution within our Insights product suite that enables local governments to showcase department performance metrics on a unique page within their transparency profile. [Learn more here.](#)

TRANSPARENCY PROFILE

Download Financials

Enhancements have been made to the format data exports to when financial data is downloaded to improve the viewing experience.

ADA Compliance

Financials now download as Excel files for ADA compliance.

TRANSPARENCY CONTINUED

Open Checkbook Improvements

A new filter has been added to allow viewers to search for the check description to quickly find what they're looking for.

WIDGETS

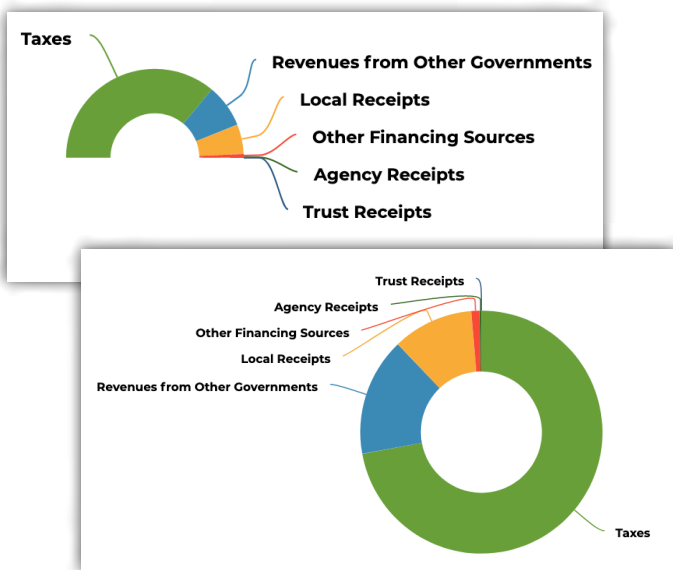

NEW: GAUGE CHART

A gauge chart has been added to the chart options for widget creators to have another creative way to display their data.

NEW: Pie Chart Options

The pie chart has expanded to include a donut and half donut chart to give users more options to customize their pie chart.

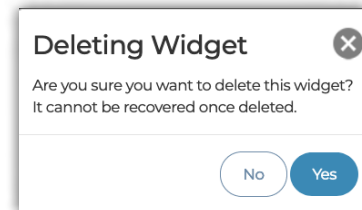

NEW: Display Options

Widget display options have been updated to include per capita and per student options for financial charts.

'Delete Widget' Warning

When deleting a widget, a new modal will appear to warn users that they are about to delete the widget.

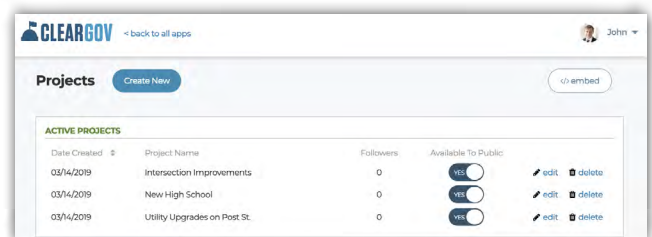

Improved Layout

The widget creation page has an updated left hand layout to improve the user experience.

PROJECTS

Landing Page Enhancements

The Projects landing page has been updated to include an 'Edit' link and an 'Embed Code' button to improve the project creation experience and enable users to embed the code on their site.

BUDGETS

NEW: 'Close Request' Warning

When users close a request round they will see a modal appear to warn them that they are about to close the round. The modal will also list which requester they're still waiting on that haven't submitted their budget.

Deselect Default Fund

We've added the ability to deselect a default fund to provide users with flexibility to select and deselect a default fund.
